

Dev Srivastava

devsrivastav64@gmail.com — +91 72660 46630 — LinkedIn — GitHub — X — LeetCode

Summary

Full-Stack MERN Developer with a strong foundation in system design, scalable cloud-native application development, and Data Structures & Algorithms (C++). Solved **500+ problems** on LeetCode with a **contest rating of 1590+**. Experienced in designing and delivering end-to-end, production-ready systems – REST APIs, microservices, and AI-integrated full-stack applications using Agile development practices.

Education

B.Tech in Computer Science – SRMCEM, Lucknow	2023 – 2027
Class 12th – City Montessori School	2022 Score: 90%
Class 10th – City Montessori School	2020 Score: 89%

Technical Skills

Languages	C++, JavaScript, TypeScript
Frameworks	React.js, Next.js, Node.js, Express.js, GSAP, Tailwind CSS, SCSS
Databases	MongoDB, Redis, Vector DB (Pinecone / Chroma), Supabase
AI & LLM	LangChain, LangGraph, RAG Pipelines, Vector Embeddings, Semantic Search
Backend	RESTful APIs, WebSockets, Socket.io, Distributed Systems, Microservices
Cloud & DevOps	Kubernetes, Docker, CI/CD, Amazon EKS, AWS S3, AWS EC2, Cloud Deployment
Practices	Agile Development, System Scalability, Performance Optimization, Git Workflows
Tools	Git, GitHub, Postman, VS Code, Antigravity, Stitch MCP

Projects

ForgeBox AI – Cloud-Native AI Coding Platform GitHub

- Architected a cloud-native, microservices-based IDE that dynamically provisions an isolated 4-container Kubernetes pod per user session, with all traffic routed through an Nginx Ingress Controller applying path-based API routing and wildcard-host subdomain routing, and automated idle-session cleanup via Redis TTL keyspace expiry events for scalability.
- Engineered a multi-tool LangChain AI agent (Mistral Medium) that autonomously reads, plans, and batch-rewrites project files over the Kubernetes internal network, hot-reloading changes via Vite HMR and streaming responses live to the client through Server-Sent Events (SSE).
- Implemented an in-browser terminal (node-pty, xterm.js, Socket.IO), persistent AWS S3 file sync via a chokidar based agent, and a RabbitMQ-decoupled notification microservice to isolate email delivery from the authentication flow, improving overall system reliability and performance.

Snitch – Full-Stack Fashion E-Commerce Platform Live Demo

- Delivered a production-ready MERN e-commerce platform with role-based access control for Buyers and Sellers, secure JWT and Google OAuth (Passport.js) authentication, and an end-to-end Razorpay checkout verified via HMAC-SHA256 cryptographic signatures.
- Designed a MongoDB aggregation pipeline (\$match → \$unwind → \$lookup → \$filter → \$cond → \$group) to resolve cart pricing at the database level with dynamic variant-to-base-product fallback, eliminating client-side computation loops and improving API response performance.

NeuroVault × IntelliSeek – AI Second Brain Live Demo

- Designed a scalable, multi-layered AI backend integrating RAG-based personal knowledge retrieval, LangChain agent orchestration, and real-time web augmentation exposed through RESTful APIs.
- Built an intelligent query pipeline that prioritizes retrieval from a vector-based knowledge vault before falling back to live web search, delivering context-aware, personalized responses.

IntelliSeek – AI Search Assistant (Perplexity Clone) Live Demo

- Developed a full-stack AI-powered search engine with live web retrieval, real-time streaming responses, semantic search, source citation, and a conversational follow-up interface.

Suraksha Setu – Verified SOS & Emergency Response System Live Demo

- Led a 4-member team through an Agile, sprint-based workflow to design and deliver an SOS alert system with one-tap and voice-triggered activation, live GPS location tracking, and Twilio SMS fallback for network-degraded environments.
- Architected mesh-based offline alert relaying enabling peer-to-peer distress-signal propagation, decoupling emergency dispatch from central server availability and improving system scalability.

Achievements

- **HackCBS 8.0 (2025)** – Participant in India's largest student-run hackathon.
- **Deputy Chief Minister of Uttar Pradesh (2022)** – Awarded 3× for leading the March Past contingent.
- **Ministry of Defence Letter of Recognition (2022)** – For outstanding academic performance in Class XII.
